

UNGARALA NAGA VENKATA RAVITEJA

Full Stack Developer — AI Enthusiast

Gurukula Homes-1, Chintal, Hyderabad, Telangana – 500054

📞 7013666788 ✉ raviteja.ungarala2003@gmail.com [in](#) LinkedIn [GH](#) GitHub [Globe](#) Portfolio

Career Objective

"A Full Stack Developer specialized in Artificial Intelligence and Machine Learning with proven, hands-on experience building intelligent, end-to-end applications. Seeking a challenging role to leverage skills in machine learning model development , computer vision , and modern web frameworks including Angular , React , Next.js , and Node.js to solve complex, real-world problems"

Education

Swarnandhra College of Engineering and Technology

Bachelor of Artificial Intelligence and Machine Learning

Sep 2021 - May 2025

Narsapur, A.P

CGPA:8.49

Sri Chaitanya Junior College

Board of Intermediate Education (M.P.C)

Jun,2019 - Mar,2021

Tadepalligudem, A.P

93.5

Sujatha E.M High School

Board of Secondary Education (10th)

Jun,2018 - Mar,2019

Palakollu, A.P

9.5

Internship

Robocopler pvt Ltd

FSD Integrated With AI Intern

Nov 2024 – Mar 2025

Vizag, A.P

- Worked on AI/ML model development for automation tasks, improving predictive accuracy by 12%.
- Developed and optimized machine learning pipelines for real-time data processing and decision-making.
- Gained practical exposure to deep learning frameworks and computer vision techniques.

AIMER Society

Artificial Intelligence Intern

May 2024 – July 2024

Vijayawada, A.P

- Collaborated with a team of 4 to implement hand gesture recognition using MediaPipe, achieving 90% accuracy in gesture classification.
- Contributed to the development of 2+ AI applications for real-time use in various industries, enhancing efficiency by 15%.
- Acquired hands-on experience with API integrations, chatbot development, and AI-based solutions.

Projects

Lane Detection for Self-Driving Cars | Python, OpenCV, NumPy, TensorFlow, PyCharm, HTML, CSS, JavaScript [link](#)

- Built a real-time lane detection system using computer vision to identify and track road lanes.
- Applied image processing techniques like Canny edge detection and Hough transform to improve accuracy.
- Created a web-based interface with **HTML, CSS, and JavaScript** for uploading videos and displaying processed results.
- Added live video streaming to visualize lane detection in real time.
- Achieved over 90% accuracy on test datasets, demonstrating its potential for autonomous driving.

TalentFlow HR Management System | React, Node.js, Express, MongoDB, Bootstrap, Render [Live Demo](#) | [Source Code](#)

- Built a full-featured HR management platform with modules for employees, leave tracking, performance reviews, and skills management using the MERN stack.
- Implemented secure session-based authentication with role-based access (Admin, HR, Employee) and protected APIs.
- Developed real-time dashboards with analytics, leaderboards, and training progress tracking.
- Designed a responsive UI with Bootstrap and custom CSS for seamless desktop and mobile experience.
- Deployed frontend on Vercel and backend on Render using MongoDB Atlas for cloud storage.

- Applied RESTful API design with error handling, input validation, and CORS configuration.

Employee Spend Management Tool | *MEAN Stack, OCR, QR Code*

[Link](#)

- Built a full-stack expense management app for employees to record and claim expenses across multiple categories.
- Automated receipt uploads using **OCR and QR code extraction**, reducing manual errors by 20%.
- Implemented role-based workflows (Employee → Manager → Finance) with real-time dashboards and notifications.
- Enhanced user experience with **lazy loading** and added a cab booking module for quick transport requests.

Montanary Elevators Website Development | *Next.js, React, Tailwind CSS, SEO, Responsive Design*

[link](#)

- Rebuilt and optimized the official website for Montanary Elevators using **Next.js** for improved performance and scalability.
- Integrated responsive layouts with **Tailwind CSS** and enhanced SEO strategies to boost search visibility and engagement.
- Ensured fast load times, seamless navigation, and cross-browser compatibility for a professional user experience.

College Management System | *Angular, TypeScript, LocalStorage, Bootstrap*

[Link](#)

- Developed a dynamic college management system with modular Angular components for students, faculty, and admins.
- Used **LocalStorage** to manage session data and maintain state without backend dependency.
- Implemented an **Examination Module** for marks, hall tickets, and exam notifications.
- Enabled admins to manage notifications, hall allocations, and marks; teachers to confirm exam duties and mark attendance via QR codes.
- Optimized performance using **lazy loading** for exam and admin modules.

Technical Skills

Programming Languages: Python, C

Frontend: HTML, CSS, JavaScript

Frontend Frameworks/Libraries: Angular, React, Next.js (Basic)

Backend Frameworks: Flask, Node.js, Express.js

Data Science / ML Frameworks: scikit-learn, TensorFlow, Pandas, Streamlit, Pygame

Databases: SQL (Basics), MongoDB

Data Visualization: Matplotlib, Seaborn, Power BI

Developer Tools: VS Code, Anaconda Navigator, GitHub

Cloud Platforms: Google Cloud Platform, MongoDB Atlas

Other Skills: Data Science, Machine Learning, Artificial Intelligence, Basic DSA

Achievements

Achieved a global rank of 1700 in IEEE Xtreme Programming Competition 18.0 and secured 1st place in the college

Qualified for the finals of the CTF-Cyber Security competition organized by PALS and Edith Cowan University, Australia — selected among the top 40 teams out of 150

Secured 2nd place in the JPMorgan Chase project presentation and demo competition by showcasing innovative project implementation

Certifications

Earned certification in NPTEL's "Python for Data Science"

Completed "AI for India 2.0" program

Certified in Microsoft Power BI

Participated in a 6-day workshop on "Python for Data Science" organized by Swarnandhra College of Engineering and Technology in collaboration with Brain-O-Vision, followed by a 24-hour hackathon

Extracurricular Activities

Worked as a Student Leader in Swarnandhra College of Engineering and Technology for PALS

Worked as an NSS Volunteer

Participated in a 2-day hackathon for project display and presentation
